

## Instructions to use the Connecting Classrooms Platform

Forum has created its own online platform specifically designed for the Connecting Classrooms project where teachers can upload and share videos submitted by their students with their partner school.

1. **Register** with the email you communicate with Forum. The platform will only accept emails known to Forum **to avoid unauthorized people** from accessing the platform.
2. You will receive an email asking you to create a password.
3. Create your **password**.
4. You will now have access to the Connecting Classroom space created for **you** and **your partner school's teacher**, featuring all the activities. **Click** on the activity box you would like to access.

5. Each activity has its **own Student Submission URL** that you can share with your students for them to submit their videos directly into the designated activity space.

6. Click on **View Your Students' Videos** to access the shared Dropbox folder. You can share the link, **View your Students' Video**, with your students to give them direct access to the videos or download the videos yourself and upload them to your school's drive. Students can comment on the videos if they sign up to Dropbox for free with their email address.

Activity 1 Edit

Name	Status	Schools
Activity 1	Active	Forum Language School Across borders
